

## Performance Data of Those in Receipt of Pupil Premium Funding 2012-2013

Children in receipt of Pupil Premium make significantly better progress than those nationally and locally.

The information in this section shows the level of progress for year groups 1-6, compared to expected progress. It also details the percentage of those children who are exceeding expected progress rates.

**The year 6 data** compares attainment and progress against **national and local data**.

This data shows how well children in our school achieve over time, and how they are making significantly better progress than other children nationally and locally. This ensures that, over their time with us, children close the gap and attain at levels exceeding those that would be expected and achieved both nationally and locally.
